

**Ex. No. 2:** Create a simple cloud software application for Flight Reservation System using any Cloud Service Provider to demonstrate SaaS.

**Aim:**

To create a simple cloud software application for flight reservation system using any cloud service provider to demonstrate SaaS.

**Procedure:**

**Step 1:** Go to [zohocreator.com](https://zohocreator.com).

**Step 2:** Log into [zohocreator.com](https://zohocreator.com).

**Step 3:** Select one application step.

**Step 4:** Enter application name as flight reservation system.

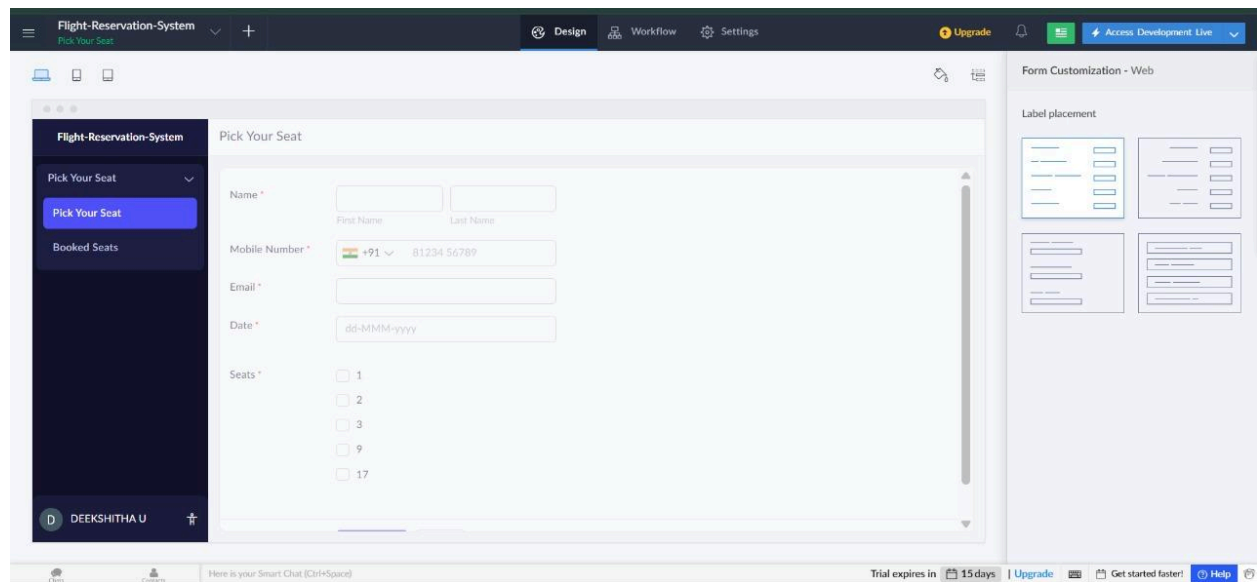

**Step 5:** Created a new application flight reservation system.

**Step 6:** Select one form

**Step 7:** The software has been created.

**Implementation:**

The screenshot displays the Zoho Creator interface for a 'Flight-Reservation-System' application. The top navigation bar includes the application name, a dropdown menu, and a 'Done' button. The left sidebar, titled 'Basic Fields', contains icons for various field types: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The central workspace shows a form with the following fields: 'Name' (with a red asterisk), 'Mobile Number' (with a red asterisk), 'Email' (with a red asterisk), 'Date' (with a red asterisk), and 'Seats' (with a red asterisk). Below the 'Date' field, there are two text boxes with the placeholder 'Your notes content will be shown here'. The right sidebar, titled 'Field Properties', shows the configuration for the 'Name' field. It includes 'Field name' (Name), 'Field link name' (Name), and a 'View Field References' link. Under 'Validation', the 'Mandatory' checkbox is checked. Under 'Display Fields', the 'First Name' and 'Last Name' checkboxes are checked, while 'Prefix' and 'Suffix' are unchecked. Under 'Data Privacy', the 'Contains personal data (PII)' checkbox is unchecked. The bottom status bar shows 'Trial expires in 15 days', an 'Upgrade' button, and a 'Get started faster!' link.

## Result:

Successfully created a simple cloud software application for flight reservation system using any cloud service provider to demonstrate SaaS.
